Example of Wiring Diagram

Component wiring diagram title, variant/subtitle and sheet number.

Coordinates (B 1).

B+ Voltage battery with switch in ON position.
30 Voltage battery with main switch on, kl.30.
15 Voltage with starter key in drive position, kl.15.
DR Voltage with starter key in drive position, preheat position and start position, kl.DR.

Splice.

Fuse.

Reference arrow, for Diagram BA, coordinates 0 C, component A17, connector PA pin 29.

Thin lines, wires.

Earth connection to circuit card.

Earth connection without wire.

Same splice can be drawn on several diagrams. The wire from the splice to the earth connection point will only be drawn and coded on one diagram. On the other diagrams will only the earth connection point be written besides the splice.

An ECU symbol with a dashed box describes that the ECU exists in several different sheets.

WIRING DIAGRAM EO

EBS

[illegible]

The diagram illustrates the electrical system for a model train layout, organized into several functional areas:

- Main Power Distribution:** A top horizontal rail serves as the main power source, connected to three fuses labeled F17 5A, F26 5A, and F1 5A. These are further protected by circuit breakers FH2A:9, FH2B:8, and FH1A:7.
- Track Section Wiring:** Multiple vertical lines represent track sections, each with a label and a wire gauge specification:
 - BE:4 D R89.A1 (0.75GN/R)
 - FB2:1 D S467.2 (0.5GN/R)
 - NC:0 C DF:3 (0.5GN/R)
 - EO:1 B S08.2 (0.5GN/R)
 - EO:1 B S08.5 (0.5GN/R)
 - EP:4 B S32.10 (0.5GN/R)
 - EP:3 D S31.10 (0.5GN/R)
 - BA:4 E S905.10 (0.5GN/R)
 - GB:0 B S01.12 (0.5GN/R)
- Common Grounding:** All track section wires converge at a common ground point labeled XSB20.
- Switch Leveling Section (S902):** A central component with multiple terminals (1-10) used for adjusting signal levels. It is connected to various inputs and outputs, including GNDIAC, GNDIACD, and GNDIAR.
- Relay and Control Circuitry:** Includes components like K3 (a relay or switch), KHIA:1, KHIA:2, and KHIA:3, which manage the power supply HDO (Headlight Drive Output).
- Power Supply HDO:** The bottom right section shows the power supply output, with connections to KL:15, B4, B5, B2, and B12, providing different voltage levels (0.5GN, 0.75VO, 0.75W).
