DESCRIPTION

It is possible that a casebolt on heating system pump (Prévost number 871052) does not have a good torque. Those pump can be installed among the above-mentioned vehicles. On some vehicles a casebolt might has been torque to 5 lbf-in instead of 15 lbf-in. Please send the pump serial number and VIN to your nearest service center as soon as possible. Your service center will send you the necessary material to solve your torque problem only if the pumps has been considered potentially defective by the supplier "M.P. Pumps". Proceed as follow to found pump serial number.

PUMP SERIAL NUMBER

The pump serial number is carved on the flange of the brass pump body. It is comprised of 2 numbers, followed by 1 letter (Fig. 1).

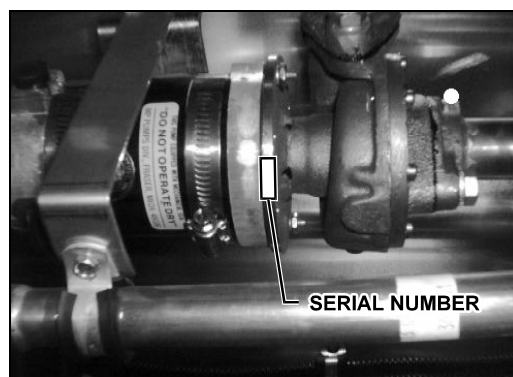

FIGURE 1: PUMP SERIAL NUMBER LOCATION 22094
