QUICK REFERENCE GUIDE

SOUND SELECTOR, VR300 RADIO & GPS NAVIGATION SYSTEM

VSS-04 SOUND SELECTOR

Power switch: there is no power button. The unit turns on automatically when the ignition switch is set to ACC or ON position and turns off when the ignition switch is set to OFF position. Start image shows "SOUND AND VISION".

DRIVER: press to adjust sound settings and select audio/video source for the driver's area. Driver's and passenger's systems are independent systems. RAD1 is default source.

CABIN: press to adjust sound settings and select audio/video source for the passenger's area.

VOLUME/VALUE: turn to adjust volume level or sound settings value for the selected audio/video source (RAD1 is default source). Each source has independent settings of volume, bass, treble, etc.

Press repeatedly to select sound settings. Settings will change as follow:

→Volume → Bass → Treble → Balance → Fade→

NOTE
Some components like the standard radio, the satellite radio and the DVD Player have their own audio controls (volume, bass, treble, balance, fade, etc.). These audio controls should be adjusted once at the beginning and should not be changed after.
If volume level or sound quality adjustments are required, they should be made using the VSS-04 Sound Selector only.
Presets of the audio controls:
• *Adjust each radio and DVD Player own volume level between 50% and 75% of their output range (DVD Player volume on remote control).*
• *Adjust radio's own bass, treble, balance and fade settings value to 0.*

CAM1: press to turn on the optional panoramic view camera. The video monitors turn on automatically. Press a second time to turn off. This function can be selected simultaneously with an audio function like the radio, the driver or guide microphone or a CD player.

NOTE
The back-up camera turns on automatically when the transmission selector is set to reverse "R".

CAM2: press to select an optional second panoramic view camera if equipped as current video source. Press a second time to cancel. This function can be selected simultaneously with an audio function like the radio, the driver or guide microphone or a CD.

AUX1, AUX2: press to select an auxiliary audio/video source like a second VHS.

NAV: press to select the navigation system display as current video source for the passenger's area. Press a second time to cancel.

LOUD: press to increase the low frequencies level of the selected audio/video source. Press a second time to cancel.

REM: press to enable use of the remote control to operate selection of sources, settings of volume, bass, treble, etc. Press a second time to cancel use of the remote control.

NOTE
Point the remote control in direction of the Sound Selector.

RAD1: press to select the dashboard radio as current audio source for the chosen area.

RAD2: press to select an optional radio (satellite radio for example) as current audio source for the chosen area.

D-MIC: press to turn on driver microphone. A gong can be heard and the current audio source volume in the passenger's area is reduced. Press a second time to turn off. When the microphone is activated, turn VOLUME/VALUE button to adjust volume value between 18 and 20. Also, you can turn on the microphone simply by pressing its on/off switch.

NOTE
Adjustment for background music
When microphone is activated, the current audio source volume will reduce to a certain level which as been set at the factory. To adjust it, proceed as follows:
1- *Press **AUX1** and **VOLUME/VALUE** at the same time.*
2- *Turn **VOLUME/VALUE** knob to adjust the background music volume.*
3- *Press **AUX1** and **VOLUME/VALUE** once again to save the setting.*
Adjustment for gong sound
If desired, a gong will sound upon activating of the microphone. This gong will also sound when a passenger activates the service bell. Gong sound level can be adjusted as follows:
1- *Press **AUX2** and **VOLUME/VALUE** at the same time.*
2- *Turn **VOLUME/VALUE** knob to adjust gong volume.*
3- *Press **AUX2** and **VOLUME/VALUE** once again to save the setting.*
*The gong sound heard upon activating of the microphone can be disabled. To do so, press simultaneously **VOLUME/VALUE** and **D-MIC** repeatedly to enable/disable the gong sound. The controller will then display MGONG N (gong disabled) or MGONG Y (gong enabled).*

G-MIC: press to turn on the guide microphone. Press a second time to turn off. When the microphone is activated, turn VOLUME/VALUE button to adjust volume value between 18 and 20. Also, you can turn on the microphone simply by pressing its on/off switch.
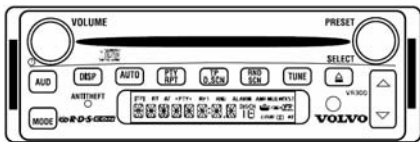

CD1, CD2, CD3: press to select up to 3 different remote CD players as current source.

DVD1: press to select DVD Player #1 as current source.

DVD2: press to select DVD Player #2 as current source.

VHS: press to select VHS as current source.

VR300 RADIO

Next/previous track

Turn   (SELECT knob)   *clockwise to skip forward or counterclockwise to skip backward to next track.*

GPS   NAVIGATION   SYSTEM

QUICK START

Below you will find a quick reference guide which describes the process for entering a bus line company home base address and start guidance to bring the coach home after taking delivery at Prevost facility, in simple, brief steps.

As soon as the navigation system is operational, an instruction about using the system appears in the display. Read this instruction and confirm it by pressing the OK button on the remote control.

**The start menu appears after you have confirmed the user instruction.**

- **Use the cursor buttons ◄, ►, ▲, ▼ on the remote control to select "Navigation" menu (checkered flag) in the "Start menu".**

The "Navigation" menu appears.

If your destination is in a state other than the displayed state, first select the destination state from the list of available states.

- **Use the cursor buttons ◄, ►, ▲, ▼ to move the cursor (colored marking) to the state item.**
- **Press OK button.**
- **Use the cursor buttons ▲, ▼ to select the destination state from the list.**
- **Press OK button to confirm the selection.**
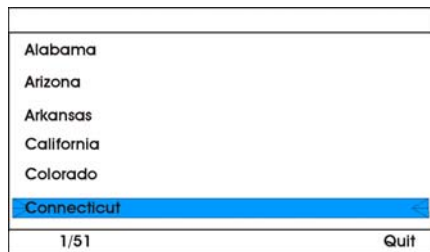

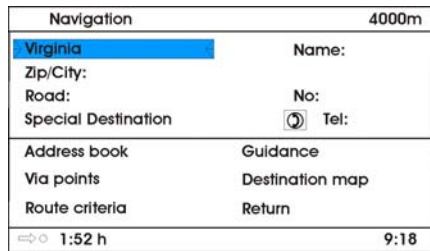

In the same manner, enter the destination address under "Zip/City" and "Road". To do so, highlight the relevant characters and then confirm with the OK button.

- **Use the cursor buttons ◄, ►, ▲, ▼ to move the cursor (colored marking).**
- **Press OK button to confirm the selection.**

Under "Name", you can give a free-text name to the address.

Because this is our home base address, we will store it in the address book under Home category.

- **Use the cursor buttons to select "Address book" and press OK button.**
- **Select "Store address" and confirm with the OK button.**

- **Select the desired address-book category (home, work, private or business) and confirm with the OK button.**

The displayed address is stored as Home address.

Select "Guidance" and press OK button to start guidance.

You will be given the first guidance message after just a short time.

Press the Navigation button to switch between the various guidance screen types (symbol display, map display, split-screen display).

Language

To change the screen display and voice guidance language:

English ⇔ French, Spanish ⇔ English

- **In the Start menu, select the "Config. du système/Settings" menu icon and press OK button.**
- **The "Config. du système/System settings " menu appears.**
- **Select "Réglages généraux/General settings" and press OK button.**
- **Select "Langue/Language" and press OK button.**
- **Select desired language and store with "Return".**

FURTHER DETAILS

Remote control
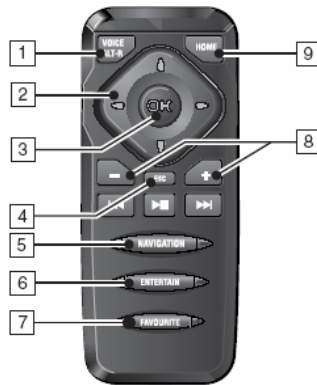

① **VOICE/ALT-R**   *Press briefly: Calls up the current audible guidance message.*

     Press and hold: Switches to "Alternative Route" menu.

② **◄, ►, ▲, ▼**   *Cursor buttons. Move the cursor in the menus.*

③ **OK**   *Confirms a selection.*

④ **ESC**   *Press briefly: Jumps back to the previous menu.*

     Press and hold: jumps directly to the Start menu.

⑤ **NAVIGATION**   *Press briefly: Switches the display type of the guidance screen.*

     Press and hold: Moves directly to the Start menu.

⑥ **ENTERTAIN**   *Press briefly: calls up the previous used entertainment source.*

⑦ **FAVORITE**   *Button freely programmable to provide direct access to selected functions.*

⑧ **-, +**   *Volume setting. Press the + or - button once or several times to increase or decrease the volume of the audible messages.*

⑨ **HOME**   *Press briefly: Adopts the address stored under "Home" in the directional guidance.*

     Press and hold: Adopts the address stored under "Work" in the directional guidance.

Menu operation

The central elements for operating the menu are the cursor buttons ◄, ►, ▲, ▼ and the OK button.

- Press the cursor buttons to move the cursor (colored marking) to the desired menu item.

- Press the OK button to confirm the selection and activate the function.

- Press the OK button to adopt the settings.

- Press the ESC button to quit the menu without adopting the set value or to move back a menu level.

Switching on/off

The navigation computer is switched on and off together with the ignition.

As soon as the navigation system is operational, an instruction about using the system appears in the display. Read this instruction and confirm it by pressing the OK button on the remote control. The Start menu appears.

Start menu

The Start menu appears after you have confirmed the user instruction. In the Start menu, the following menu options are available.

Navigation	Calls up the main navigation menu (e.g. for destination input, guidance, address book, etc.).
Map	Calls up the previous selected guidance screen.
Travel info	Calls up the menu with the available C-IQ travel information products (e.g. travel guide, restaurant and hotel guide).
Emergency	Display the Emergency menu with the current vehicle location and the national emergency telephone number. In addition, you can program a telephone number for a breakdown service.
Info	Calls up the Info menu with TMC traffic information. Other information relating to the current route is available.
Trip computer	Calls up the trip computer display with the trip data and the current GPS position.
Telephone	Calls up the Telephone menu (this entry appears only if a relevant system upgrade is connected).
Bluetooth	Calls up the Paring menu (this entry appears only if a relevant system upgrade is connected).
TV/Video	Switches to the connected TV/video source (e.g. TV tuner) (this entry appears only if a relevant system upgrade is connected).
C-IQ	Calls up the C-IQ menu. Here, you can activate C-IQ products and manage your C-IQ products.
Settings	For the individual adjustment of the navigation system.
Stand-by	Switches the system into stand-by mode. Press the OK button to reactivate the system.
