3.0 MATERIALS

Water

Paste soap (Ph neutral) or Shampoo (Ph neutral)

4.0 PROCEDURE

GENERAL CLEANING (POWDER, PILLING, FLUFF)

1. – Suck the excess of dirt with the help of a vacuum cleaner
2. - If dirt remains, brush them in both directions and aspirate impurities.
3. - Do not use new or damp cloth to remove the dust.

CLEANING STAINS WITH PASTE SOAP OR SHAMPOO

1.- With a microfiber clean cloth, remove the excess of dirt only in the piece of fabric with the stain (coffee, milk, soft drinks, food).

Excess dirt should be removed as soon as possible to prevent it from penetrating the fabric and being more difficult to remove.

2.- In a container, pour water and soap of paste or shampoo, shake vigorously until the formation of foam is observed.

3.- Moisten the microfiber with the soapy solution.

4.- Wrap the brush with the wet microfiber.

5.- Brush the fabric with light circular movements.

6.- Remove dirt with a clean microfiber cloth or preferably use a vacuum cleaner to aspirate impurities.

7.- Repeat steps 3, 4 and 5 as many times as necessary until the dirt is removed.

8.- Dry the fabric with sunlight or with the help of an air gun.

9.- Finally brush the fabric and aspirate impurities.
