**DESCRIPTION**

On the above-mentioned vehicles, it is possible to reverse the tag axle lifting logic in order to pressurize the system only when the axle is lifted. In normal driving conditions the tag axle is lowered and the air pressure is not acting on the pneumatic valves, thus preventing air leaks. In order to carry out this modification you need to order one of the following kits :

**VIP-45 OR H3-41, H3-45 COACHES WITH TAG AXLE LIFTING OPTION : KIT # 142019**

**H3-41, H3-45 COACHES WITHOUT TAG AXLE LIFTING OPTION : KIT # 142020**
