CONTENTS

1 LUBRICATION

The efficiency and life expectancy of mechanical equipment is largely dependent on proper lubrication and servicing. All mechanical components rely on a lubricating film between moving parts to reduce friction, prevent wear and oxidation. Proper lubrication also helps cool the parts and keep dirt particles away from mating surfaces. Efficient lubrication depends upon using the right type of lubricant, at specified intervals and by filling to correct capacities. Past experience shows that many service problems can be traced to an improper lubricant or to incorrect lubrication procedures.

A comprehensive maintenance and lubrication program is important to ensure the long service life this vehicle was designed for and to avoid costly repairs and associated downtime caused by premature part failure.

A lubrication schedule is included in this section to give the location of key service points on the vehicle as well as the lubricant specifications for each component to be serviced. Specific instructions on how to check and service different components are covered in their respective sections in this maintenance manual.

The recommended lubrication intervals are based on normal operating conditions and mileage accumulation.

Shorten the intervals if your vehicle operates in more severe conditions. Severe conditions include heavy towing, high vehicle weight or operation in mountainous areas. Some parts and equipment referred to in this section may not be installed on your vehicle.

Dispose of used lubricants and filters in an environmentally safe manner, according to federal and/or local recommendations.

2 FLEXIBLE HOSE MAINTENANCE

The performance of engine and equipment are greatly related to the ability of flexible hoses to supply lubricating oil, air, coolant, and fuel oil. Maintenance of hoses is an important step to ensure efficient, economical, and safe operation of the engine and related equipment.

2.1 HOSE INSPECTION

Check hoses daily as part of the pre-starting inspection. Examine hose for leaks, and check all fittings, clamps, and ties carefully. Ensure that hoses are not resting on or touching shafts, couplings, heated surfaces including exhaust manifolds, any sharp edges, or other obviously damaging areas. Since all machinery vibrate and move to a certain extent, clamps and ties can fatigue over time. To ensure proper support, inspect fasteners frequently and tighten or replace them as necessary.

⚠ WARNING

Personal injury and property damage may result from fire caused by leaking flammable fluids.

2.1.1 Leaks

Hoses have a limited service life. Thoroughly inspect hoses annually. Look for surface damage or indications of twisted, worn, crimped, cracked or leaking lines. Replace damaged hoses immediately.

2.1.2 Service life

The limited service life of a hose is determined by the temperature and pressure of the gas or fluid within it, the time in service, its installation, the ambient temperatures, amount of flexing, and the vibration it is subjected to. With this in mind, it is recommended that all hoses be thoroughly inspected at least every 12 months. Look for surface damage or indications of damaged, twisted, worn, crimped, brittle, cracked, or leaking lines. Hoses having a worn outer surface or hoses with a damaged metal reinforcement should be considered unfit for further service.

It is also recommended that all hoses in this vehicle be replaced during major overhaul and/or after a maximum of five service years. Quality of replacement hose assemblies should always be equal to or superior to those supplied by the Original Equipment Manufacturer.

3 LUBRICATION AND SERVICING SCHEDULE - COACHES

Following this service schedule is the most economical and easiest way to ensure your vehicle performs at its best, safest and longest. Also, unscheduled maintenance will be minimized since inspection should expose potential problems before they become major ones.

IMPORTANT NOTE
Refer to the manufacturers documentation included in this maintenance manual for specific manufacturer's maintenance requirements.

OPERATING CONDITION

Use the information that follows to determine the operating condition and usage applicable to your vehicle

Heavy	Normal
Between 5 mpg and 6 mpg Between 39 L/100 km and 50 L/100 km	Greater than 6 mpg Less than 39 L/100 km

PROCEED TO MAINTENANCE OPERATION EVERY

Proceed to maintenance operation at miles, km, months or hours whichever comes first

			Item	Month	6 250 mi / 10 000 km	12 500 mi / 20 000 km	31 250 mi / 50 000 km	50 000 mi / 80 000 km	100 000 mi / 160 000 km	106 000 mi / 170 000 km	125 000 mi / 200 000 km	150 000 mi / 240 000 km	185 000 mi / 300 000 km	250 000 mi / 400 000 km	300 000 mi / 500 000 km	500 000 mi / 800 000 km	600 000 mi / 960 000 km	Lubricant / Fluid [1]
GENERAL																		
1	Flexible hoses – thoroughly inspect all hoses, tighten the hose clamps to prescribed torque			12				●										
01 ENGINE																		
1	regular drains	Engine oil & filter – heavy operating condition, change every 35 000 mi / 60 000 km	24															C
2		Engine oil & filter – normal operating condition, change every 45 000 mi / 75 000 km	24															C
3	extended drains B	Engine oil & filter – heavy operating condition, change every 40 000 mi / 65 000 km	24															B
4		Engine oil & filter –normal operating condition, change every 55 000 mi / 90 000 km	24															B
5	extended drains A	Engine oil & filter – heavy operating condition, change every 45 000 mi / 70 000 km	24															A
6	(factory filled)	Engine oil & filter – normal operating condition, change every 60 000 mi / 95 000 km	24															A
7	Air cleaner – change filter element when indicated by restriction indicator or after a maximum of 2 years		29 30	24														
8	Drive belts (all) – check tension, inspect for cracks or frayed material, change belt that display obvious wear or defects			6			●											★
9	Valve & injector clearance – initial adjustment (2500 hrs.)			12								●						★
10	Valve & injector clearance – check & adjust (5000 hrs.)			24											●			★
11	Drive belt tensioners & idlers (water pump, fan, alternators) – remove belts, check for noisy bearings, play, bushing play			3														★
12	Drive belt tensioners & idlers (water pump, fan, alternators) – change proactively											●						★
03 FUEL																		
1	Primary & secondary fuel filters – change at every engine oil change		21 22															
2	Preheater fuel filter – change		50	12				●										
04 EXHAUST AND AFTERTREATMENT SYSTEM																		
1	Diffuser assembly, rain cap & drain tube – check proper functioning, clean		34	12														

★= Specialty tool required. You will find the SPECIALTY TOOLS REQUIRED FOR REGULAR MAINTENANCE table and the LUBRICANTS SPECIFICATIONS table following this Lubrication and Servicing Schedule.

[1] See paragraph 6.0 FLUIDS AND LUBRICANTS SPECIFICATIONS of this section for lubricant specifications.

The maintenance procedures are found in their respective section of the maintenance manual

A red stripe in the left margin of the schedule highlights the latest changes

		Item	Month	PROCEED TO MAINTENANCE OPERATION EVERY Proceed to maintenance operation at miles, km, months or hours whichever comes first 6 250 mi / 10 000 km	12 500 mi / 20 000 km	31 250 mi / 50 000 km	50 000 mi / 80 000 km	100 000 mi / 160 000 km	106 000 mi / 170 000 km	125 000 mi / 200 000 km	150 000 mi / 240 000 km	185 000 mi / 300 000 km	250 000 mi / 400 000 km	300 000 mi / 500 000 km	500 000 mi / 800 000 km	600 000 mi / 960 000 km	Lubricant / Fluid [1]
2	DEF pump filter – change (4 500 hrs.)	32	36								●								
3	DEF tank – drain, clean with water, clean filler neck strainer (4 500 hrs.)	32	12								●								
4	Aftertreatment Hydrocarbon Injector (AHI) nozzle – change (4 500 hrs.)										●								
5	DPF filter – either clean or change filter cartridge every 400 000 mi / 650 000 km (10 000 hrs.)	33																	★
	05 COOLING																		
1	Coolant filter housing shut-off valve – rotate the handle periodically to keep the spindle rotation smooth	28	6																
2	Coolant surge tank – test coolant solution	27	12		●														★
3	Radiator – inspect exterior core & clean with low pressure water jet if necessary	40							●										
4	Coolant filter – change (Long-Life Filter without additives to be used with Extended Life Coolant)	28	12								●								
5	Coolant filter housing shut-off valve spindle – apply fresh grease	28	12								●								P
6	Cooling system – drain, flush & refill (Extended Life Coolant) every 750 000 mi / 1 200 000 km	27	96																E ★
	06 ELECTRICAL																		
1	Power cables inspection – Perform MI15-24		3																
2	Battery terminals – clean & coat terminals with Nyogel		12																
3	Alternators – remove belts, check for noisy bearings, bearing play		3		●														
	07 TRANSMISSION [2]																		
1	**Allison** – change transmission fluid, Main & Lube filters (Refer to TABLE 1 in Section 07: Transmission for Main & Lube filter change intervals). **Conditions:** filled with TES389 approved fluid + Prognostics mode disabled	20																	M
2	**Allison** – change transmission fluid, Main & Lube filters (Refer to TABLE 2 in Section 07: Transmission for Main & Lube filter change intervals). **Conditions:** filled with TranSynd or TES295 synthetic fluid only (no mixture[3,4]) + Prognostics mode disabled	20																	L
3	**Allison** – change fluid & filters when indicated by TRANSMISSION SERVICE indicator or 60 months whichever occurs first. In addition, change filters with every fluid change. **Conditions:** filled with TranSynd or TES295 synthetic fluid only (no mixture[3,4]) + Prognostics mode enabled	20	60																L
4	**Allison** – change fluid & filters when indicated by TRANSMISSION SERVICE indicator or 24 months whichever occurs first. In addition, change filters with every fluid change.	20	24																M

[2] In the absence of a fluid analysis program, the fluid change interval listed in Table 1, Table 2 & Table 3 should be used. Change filters according to Table 1, Table 2 & Table 3 even if a fluid analysis shows that the fluid doesn't need to be changed.

[3] When the transmission contains a mixture of fluids (defined as the quantity of non-TranSynd or non-TES 295 fluid remaining in the transmission after a fluid change combined with the quantity of TranSynd or TES295 required to fill the transmission to the proper level), perform the fluid and filter change according to the TES389 intervals.

[4] Extended TranSynd or TES 295 fluid and filter change intervals are only allowed with Allison High-Capacity filters.

5 LUBRICATION AND SERVICING SCHEDULE - MOTORHOMES

LUBRICATION AND SERVICING SCHEDULE H3-45 VIP & X3-45 VIP MOTORHOMES (Private Use) A red stripe in the left margin of the schedule highlights the latest changes	ITEM	EVERY (months)	LUBRICANT / FLUID [8]
GENERAL			
All flexible hoses **–** inspect		12	
H3 VIP Series only: Main power compartment fan air filter – inspect		12	
01 ENGINE			
Engine oil and filters – change	24	12	A B C
Air cleaner – change filter element	30	24	
Engine mounted alternators & house alternator(s) – change drive belts and intermediary drive belts		24	
Drive belts (all) – check tension, inspect for cracks or frayed material, change belt that display obvious wear or defects		12	
Drive belts (all) – change		24	
Drive belt tensioners & idlers (water pump, A/C compressor, alternators) – remove belts, check for noisy bearings, play, bushing play		3	
Valves and injectors – initial adjustment: after 2 500 hours or 36 months whichever occurs first	24	36	
Valves and injectors – check and adjust: every 5 000 hours or 72 months whichever occurs first	24	72	
03 FUEL			
Primary fuel filter & secondary fuel filter – change at every engine oil change	21, 22		
04 EXHAUST AND AFTERTREATMENT SYSTEM			
DPF filter – either clean or change filter cartridge after 4 500 hours	33		
Aftertreatment Hydrocarbon Injector (AHI) nozzle – change after 4 500 hours			
DEF tank – drain and clean with water, clean filler neck strainer	32	12	
Diffuser assembly, rain cap & drain tube – check proper functioning, clean	34	24	
DEF pump – change filter element	32	36	
05 COOLING			
Coolant surge tank – test coolant solution	27	12	
Coolant filter housing shut-off valve – rotate the handle periodically to keep the spindle rotation smooth & free. Apply fresh grease on the spindle if needed	28	12	P
Coolant filter – change (Long-Life filter with Extended Life Coolant)	28	12	
Cooling system – drain, flush & refill (with Extended Life Coolant)	27	96	E
06 ELECTRICAL			
Alternators – remove belts, check for noisy bearings, bearing play		3	
Battery terminals – clean and coat terminals		12	
Power cables inspection – Perform MI15-24		24	
07 TRANSMISSION [9]			
Filled with TES389 approved fluid, with **Prognostics mode disabled** – see TABLE 1 in *Section 07: Transmission* for fluid and filter change	20		M

[8] See paragraph 6.0 of this section for lubricant specifications.
[9] In the absence of a fluid analysis program, the fluid change interval listed in Table 1, Table 1 & Table 3 should be used. Change filters according to Table 1, Table 2 & Table 3 even if a fluid analysis shows that the fluid doesn't need to be changed.

LUBRICATION AND SERVICING SCHEDULE H3-45 VIP & X3-45 VIP MOTORHOMES (Private Use) A red stripe in the left margin of the schedule highlights the latest changes	ITEM	EVERY (months)	LUBRICANT / FLUID [8]
Filled with TranSynd or TES295 approved fluid only, no mixture[10], with **Prognostics mode disabled** – See TABLE 2 in *Section 07: Transmission* for fluid and filter change	20		L
Filled with TranSynd or TES295 approved fluid only, no mixture with **Prognostics mode enabled** [11] - Change fluid & filters when indicated by TRANSMISSION SERVICE indicator or 60 months whichever occurs first. In addition, change filters with every fluid change.	20	60	L
Filled with TES389 approved fluid only, no mixture with **Prognostics mode enabled** – Change fluid & filters when indicated by TRANSMISSION SERVICE indicator or 24 months whichever occurs first. In addition, change filters with every fluid change.	20	24	M
09 PROPELLER SHAFT			
Universal joint – grease on fitting on each universal joint	18	12	P
11 REAR AXLE			
Drive axle – check differential oil level, add if necessary	17	12	
Drive axle – change differential oil, clean breathers	17	12	G
Tag axle lever pivot, grease one fitting on each pivot	19	12	P
Drive axle – change differential oil, clean breathers (with full synthetic oil)	17	48	H
12 BRAKE & AIR			
Air tanks – drain water from all tanks		12	
Brake pads[12] – check pad wear indicator		12	
Check caliper running clearance, check condition of caliper cover, slack adjuster cap and guide pin assembly covers		12	
ABS & electronic stability control systems – check proper functioning		12	
Air dryer – change cartridge	13	24	
Accessories air filter – change filter element	2	48	
13 WHEELS, HUBS & TIRES			
Unitized hub bearing, front and tag axle – inspect, check end play	8	12	
14 STEERING			
Steering knuckle (king) pins – check play	8	12	
Steering knuckle (king) pins – grease fitting on top & bottom	8	12	P
Tie rod ends – clean and grease one fitting at each end		12	P
Drag link ends – clean and grease two fittings at each end		12	P
Tie rod end & drag link end ball joints – inspect for corrosion		12	
Power steering reservoir filter element – change	23	24	
Power steering fluid – check fluid condition (color) through visual inspection and change if required. Check level, add if necessary	23	12	D
Idler arm – grease fitting		12	P
Bell crank – grease fitting		12	P
Relay rod ends – grease one fitting at each end		12	P
Steering system – check play		60	

[10] When the transmission contains a mixture of fluids (defined as the quantity of non-TranSynd/ non-TES 295 fluid remaining in the transmission after a fluid change combined with the quantity of TranSynd or TES295 required to fill the transmission to the proper level), perform the fluid and filter change according to the TES389 intervals.

[11] Extended TranSynd or TES295 fluid and filter change intervals are only allowed with Allison High-Capacity filters.

[12] At each pad replacement, check slack adjuster operation, perform caliper slide check and inspect visually all sealing elements & caps.

LUBRICATION AND SERVICING SCHEDULE H3-45 VIP & X3-45 VIP MOTORHOMES (Private Use) A red stripe in the left margin of the schedule highlights the latest changes	ITEM	EVERY (months)	LUBRICANT / FLUID [8]
16 SUSPENSION			
Independent front suspension upper a-arm ball joint – grease fittings		12	Q
22 HEATING & AIR CONDITIONING			
A/C compressor (Bitzer) – empty shaft seal oil collection tube	44	1	
A/C compressor (Bitzer) – check oil level and color	44	12	
A/C compressor (Bitzer) – change oil, clean oil filter and magnetic plug	44	36	F
A/C receiver tank – check refrigerant level, add if required	42	12	
Refrigerant moisture indicator – check filter dryer unit, change according to moisture indicator	43	12	
HVAC air filters – clean all filter elements	41, 45	12	

5.1 MOTORHOMES LUBRICATION AND SERVICING SCHEDULE CHANGE LOG

	CHANGE LOG - LUBRICATION AND SERVICING SCHEDULE	DATE
1	ADDED: 04 EXHAUST & AFTERTREATMENT SYSTEM - Diffuser assembly, rain cap & drain tube – check proper functioning, clean	Sept.04, 2014
2	UPDATE: 05 COOLING – Cooling system with extended life coolant, drain flush & refill, was 48 months, changed to 96 months	Jan.08, 2015
3	ADDED: 06 ELECTRICAL – Power cables inspection	May 27, 2015
4	ADDED: 04 EXHAUST AND AFTERTREATMENT SYSTEM – AHI nozzle replacement	Aug.12, 2015
5	ADDED: 14 STEERING – Steering system play inspection	Aug.18, 2016
6	UPDATE: 14 STEERING – Steering system play inspection, was 48 months, changed to 60 months	Sept.18, 2016
7	REMOVED: 06 ELECTRICAL –HD10 Bosch alternators brushes inspection & replacement	Nov.10, 2016
8	UPDATE: 14 STEERING – Power steering fluid drain, changed to “check condition”	Nov.15, 2017
9	UPDATE: 14 STEERING – Power steering reservoir filter element change, was 12 months, changed to 24 months	Nov.15, 2017
10	ADDED: 22 HEATING & AIR CONDITIONING – check oil level, change oil, clean oil filter and magnetic plug	Nov.15, 2017
11	REMOVED: 05 COOLING – Radiator fan gearbox oil check/drain & drive belt check	April 9, 2018
12	ADDED: 05 COOLING – Coolant filter housing shut-off valve – Rotate valve handle and grease spindle	April 9, 2018
13	ADDED: 06 ELECTRICAL – Alternators – remove belts, check for noisy bearings, bearing play	June 12, 2023
14	ADDED: 01 ENGINE – Drive belt tensioners & idlers (water pump, A/C compressor, alternators) – remove belts, check for noisy bearings, play, bushing play	June 12, 2023

6 FLUIDS AND LUBRICANTS SPECIFICATIONS

Coaches Schedule	FLUIDS & LUBRICANTS TABLE		Motorhomes Schedule
REF	**SYSTEMS**	**DESCRIPTIONS / SPECIFICATIONS**	
A	Engine Oil	Extended drains A	SAE Viscosity Grade: 10W-30 Filled with "**Volvo Premium Motor Oil VDS-4.5**"
B	Engine Oil	Extended drains B	SAE Viscosity Grade: 10W-30 Filled with Volvo Approved VDS-4.5 oils
C	Engine Oil	Regular drains	SAE Viscosity Grade: 10W-30 Filled with Volvo Approved VDS-4 oils
D	Power Steering fluid	Automatic Transmission Fluid (ATF), Dexron-IIIF, G, H or Dexron-VI Refer to **Bosch List of lubricants TE-ML 09** for further details	
E	Engine Coolant	Texaco or Chevron Extended Life Coolant (ELC) 50% antifreeze/water solution is normally used	
F	A/C Compressor Oil	Central HVAC system: Polyolester oil, HFC 134a compatible; Castrol SW-68 (POE) or equivalent Small HVAC system: PAG oil	
G	Meritor drive axle	**Regular drains**	Refer to Meritor technical bulletin **TP-9539 Approved Rear Drive Axle Lubricants**
H	Meritor drive axle	**Extended drains with Full Synthetic**	Refer to Meritor technical bulletin **TP-9539 Approved Rear Drive Axle Lubricants**
I	ZF Drive Axle	Transmission oil, viscosity SAE 80W-90 among ZF **Lubricant Class 12M.** Refer to ZF **List of lubricants TE-ML 12** for Class 12M approved lubricants. Take note that oil change intervals will differ when using other lubricant class	

Coaches Schedule

FLUIDS & LUBRICANTS TABLE

Motorhomes Schedule

REF	SYSTEMS	DESCRIPTIONS / SPECIFICATIONS	
J	ZF Drive Axle compact bearing (hub unit)	Lithium saponified, multipurpose grease, NLGI No.2 among ZF **Grease Class 12H** Refer to ZF **List of lubricants TE-ML 12** for other approved lubricants. Take note that grease change intervals may differ when using other lubricant class	
K	---	---	
L	Allison Transmission Oil	**Extended drains**	Castrol TranSynd™ Synthetic Transmission Fluid for Allison or TES 295 approved equivalent
M	Allison Transmission Oil	**Regular drains**	Schedule1 TES-389 fluids or approved equivalent
N	Volvo I-Shift Transmission	**Extended drains**	- Volvo I-Shift Transmission Fluid 75W-80 - Mobil Delvac Synthetic Transmission Oil V30 75W-80 (Factory filled) or other Volvo approved oils
O	---	---	
P	Multi Purpose Grease	Good quality lithium-based grease: NLGI No.2 Grade is suitable for most temperatures NLGI No.1 Grade is suitable for extremely low temperatures	
Q	Multi Purpose Grease	Molykote longterm 2/78 grease	

6.1 FLUIDS AND LUBRICANTS SPECIFICATIONS CHANGE LOG

	CHANGE LOG	DATE
1	Lubricant And Coolant Specifications Table – Dexron-VI removed from Ref I. Dexron-VI is no longer recommended for use in commercial on-highway transmission. Allison Service Tip #1099revS	Nov.11, 2015
2	I-Shift transmission: Castrol Syntrans Grade SAE 75W-85 synthetic oil is no longer approved for extended drains interval	Nov.25, 2015
3	Added: Lubricants "I" & "J" for ZF drive axle	Apr.26, 2016
4	New Engine oil specification VDS-4.5 (CK-4) introduced. New oil specification compatible with former D13 engine versions	Dec.15, 2016
5	Power steering fluid, Dexron VI added	Nov.15, 2017
6	Removed: reference to Castrol Syntrans Grade SAE 75W-85 synthetic oil for I-Shift transmission, regular drains	Apr.9, 2017
