DESCRIPTION

Having as an objective to constantly better our product and answer our clients concerns, Prévost Car recommends installing on the above mentioned vehicles, a protective cover over the parking brake button in order to ensure conformity with vehicles being currently produced and improve finition of dashboard.

MATERIAL

Part No	Description	Qty
391727	Parking Brake Button Protective cover	1

Note : Material can be obtained through regular channels.

PROCEDURE

Warning : Park vehicle safely, apply parking brake, stop engine and set battery master switch(es) to the "OFF" position prior to working on the vehicle.

Warning : The vehicle must be on a plane surface, and the wheels must be blocked by other means in addition to parking brake.

1. Drive the button roll-pin out with a punch and remove the parking brake button.

Note : The parking brake is located on the lateral console, left of driver's seat. See figure 1.

2. Install parking brake button inside protective cover (Prévost part #391727), indexing them so that roll pin can be installed. Secure button by installing the roll pin. See figure 2.

Note : The operation of the parking brake will be modified by the addition of the protective cover. To apply parking brake, lift protective cover c/w button ; to release parking brake, open protective cover and push yellow button.
