SUBJECT : BEARINGS FOR IDLER PULLEYS	

### ***IMPORTANT NOTICE***

*This modification is recommended by PrevoSt to increase your vehicle's performance. Note that no reimbursement will be awarded for carrying out this modification.*

### **APPLICATION**

Upon replacement of pulleys used on PrevoSt vehicles fan and A/C and alternator idlers/tensioners (except commuter vehicles)

### **DESCRIPTION**

Improved bearings are now available to replace the original bearings used on some PrevoSt vehicles idler pulleys (see application table below).

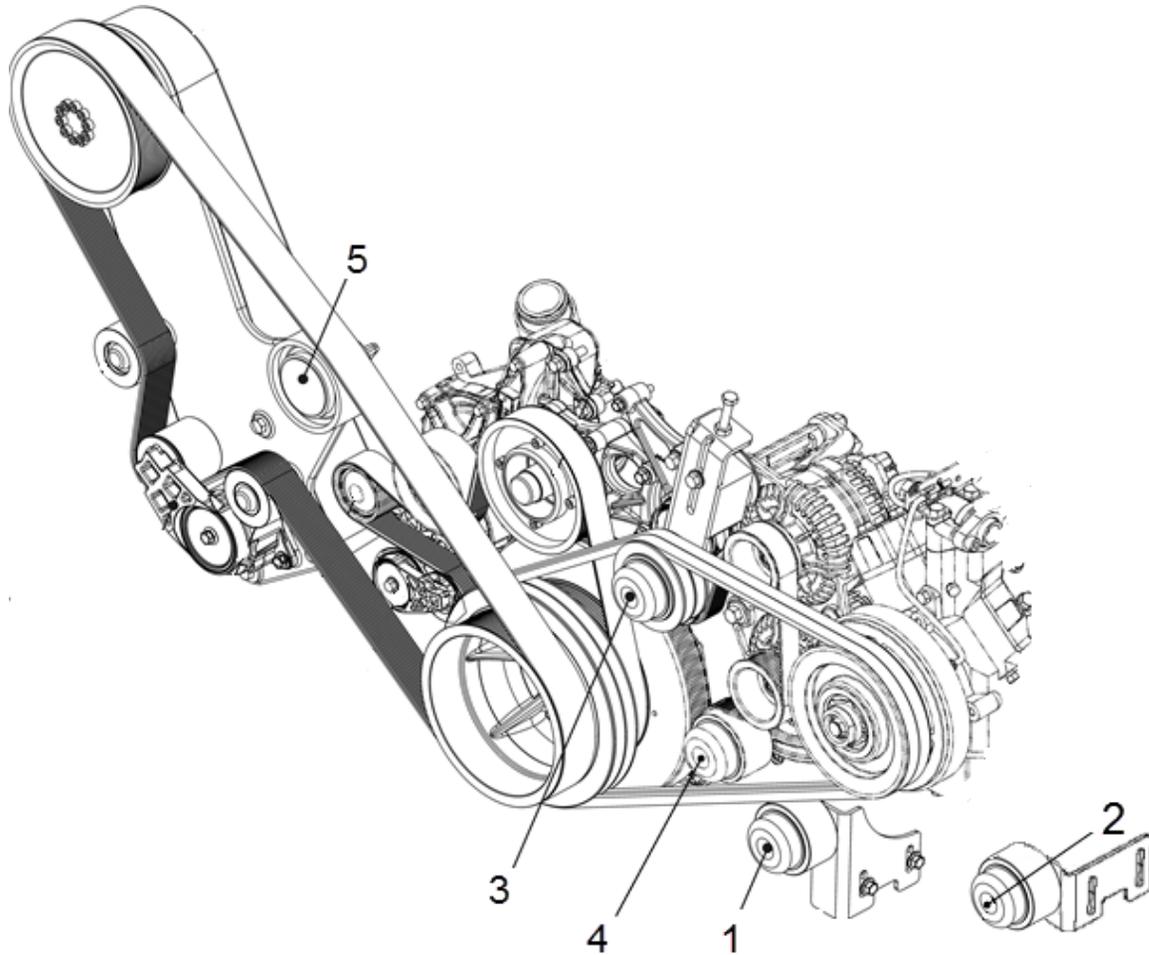

These bearings, of heavier duty construction, will offer extended durability when compared with the original units. These new bearings will now be installed in older model pulley assemblies sold as replacement parts and will also be offered as a "bearing only" part number (see table 1, current & improved part # columns).

New complete idler assemblies equipped with hi-temperature bearings will also be available for customers wanting to replace their current units on vehicles operating in severe conditions and/or hi-temperature environment (see table 1, new & hi-temp part # columns).

The bearings used in these new idlers will offer maximum durability through the use of hi-temperature grease and seals along with an inner steel cage.

*Refer to table and illustrations below to order the correct bearings/pulley assemblies.*

**KIT 450333 INCLUDES**

- 450096 - pulley/bearing assembly
- 5001894 - (2X) Washer 21x30x1.58
- 053725 - bushing

**KIT 450334 INCLUDES**

- 450096 - pulley/bearing assembly
- 5002008 - Washer 13x35
- 053724 - bushing
- 5001761 - nut hex M12 - 1.75 G8
- 5001862 - screw hex M12 - 1.75x70 (10.9)

**KIT 010074 INCLUDES**

- 012349 - pulley/bearing assembly
- 060137 - bushing
