DESCRIPTION :

On the drive axle air brake chamber, a rubber cap needs to be removed in order to ensure the secondary chamber drainage.

PROCEDURE

Warning : Park vehicle safely, apply parking brake, stop engine and set battery master switch(es) to the OFF position prior to working on the vehicle.

1. Lift vehicle using proper jacking points (refer to your vehicle's Maintenance Manual for further details);
2. Locate each drive axle brake air chamber (see figure 1);

3. With a screwdriver, remove the lowest rubber cap located on the air brake chamber (see enlarged portion in figure 1). Proceed on both sides of the vehicle, but only on the drive axle;
4. Lower the vehicle.

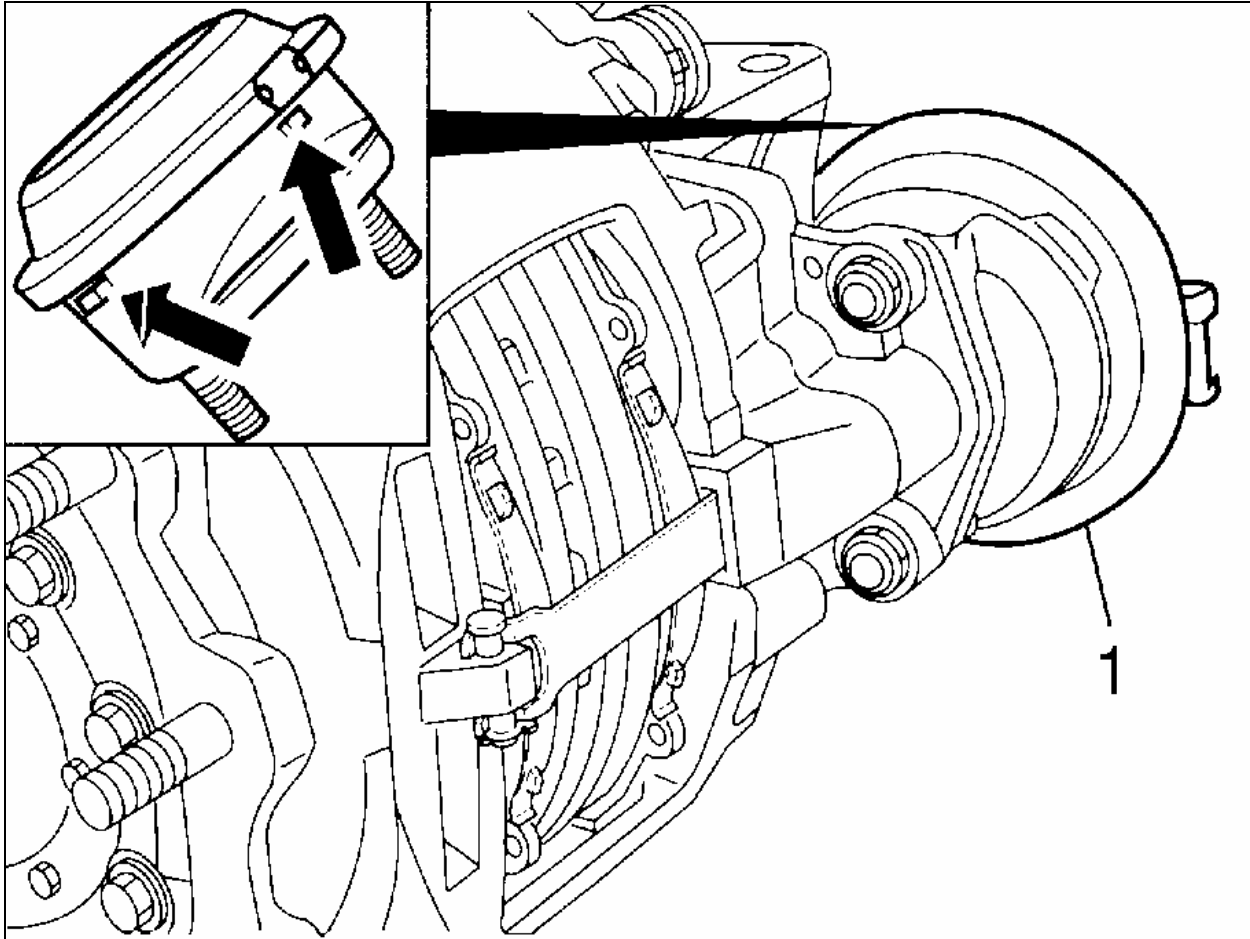

Figure 1: Location of rubber caps on brake air chambers.
