**WARRANTY  
BULLETIN**

Wb03-17A

DATE : DECEMBER 2003	SECTION : 12 - Brakes
EXPIRATION: DECEMBER 2005	
SUBJECT : BENDIX AD-9 AIR DRYER CONNECTION	

REVISION : A

WIRE TO BE CONNECTED CHANGED FOR 24IA

**APPLICATION**

Model	VIN	
H3-41, H3-45 Coaches Model Year : 2003 - 2004	From 2PCH3349X31014582 up to 2PCH3349831014709 incl.	
VIP-45 Model Year : 2003	From 2PCV3349431014581 up to 2PCV3349031014710 incl.	

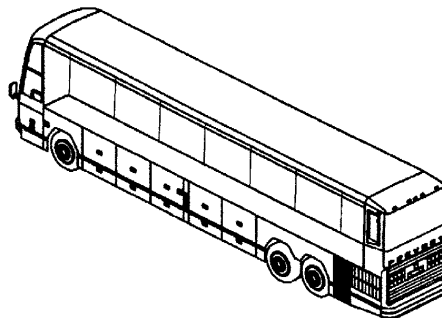

**DESCRIPTION**

On the above-mentioned vehicles, electrical connection of the air dryer heating element may have been omitted. If the heating element is not energized and cold weather is present, the air dryer drying capability is greatly reduced and humidity might exist into the air system to the point of blocking lines. Check if connection has been completed and if this is not the case, carry on with the following procedure.

**PROCEDURE**

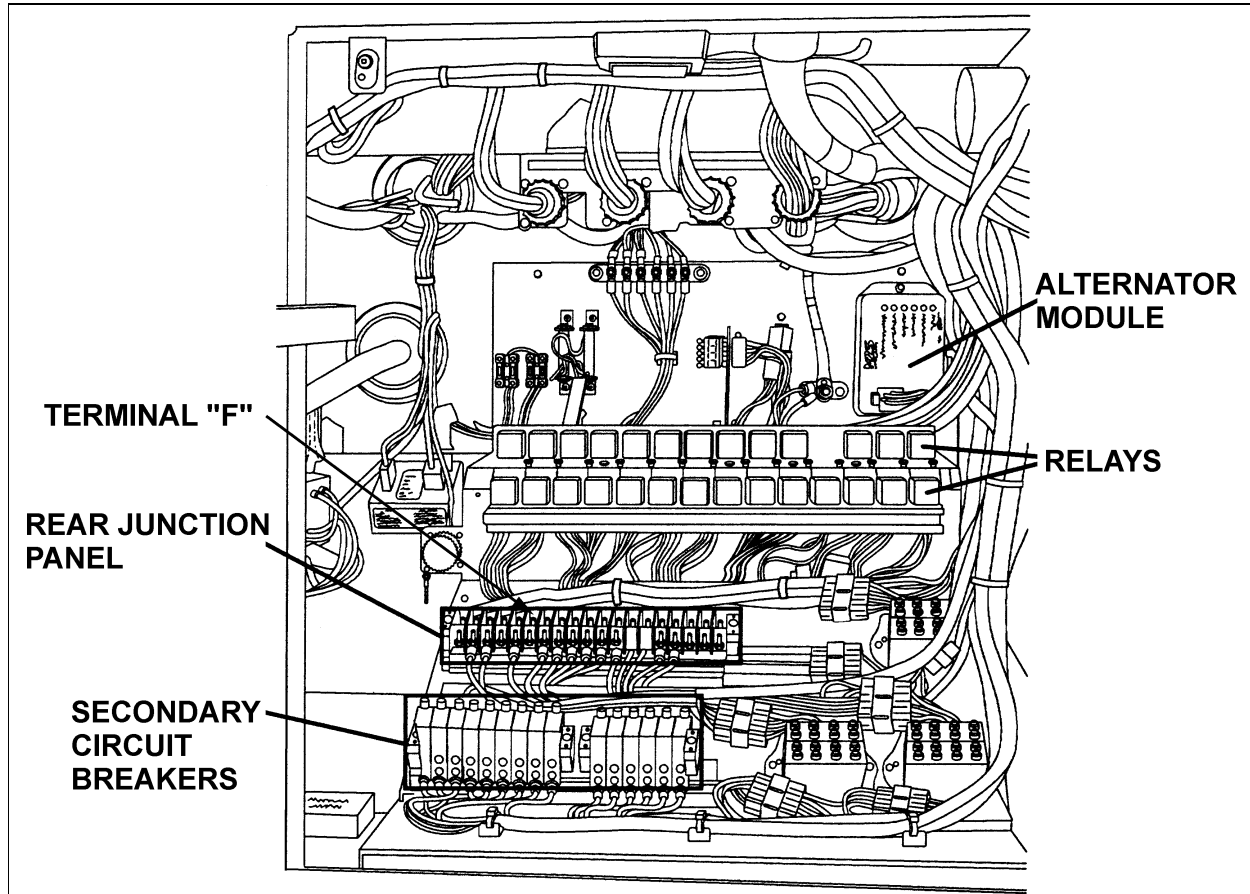

**Warning:** Park vehicle safely, apply parking brake, stop engine and set battery master switch(es) to the OFF position prior to working on the vehicle.

1. Open rear electrical compartment door.

2. Check if wire 24IA is connected with terminal "F". If this is the case, the procedure is completed.
3. If this is not the case, locate wire 24IA, it should be attached to the wire harness located between the relays and rear junction panel.
4. Remove heat-shrink tubing from wire terminal or cut wire and install the proper ring terminal.
5. Connect wire 24IA onto terminal "F" and tighten.
6. Turn ignition switch key to "ON" position.
7. Check if voltage at connector C402 located near air dryer is 24 volts.

**Note:** In the case of VIPs only, change decal 065509 using a labeler to identify fuse F5.

## WARRANTY

This modification is covered by Prévost Car's normal warranty. We will reimburse you ¼ hour (0.25) of labor upon receipt of a completed A.F.A. form on which you must specify as per "Warranty Bulletin 03-17A".

## Parts / Waste disposal:

Discard waste according to applicable environmental regulations (Municipal/State[Prov.]/ Federal)
