<p>This bulletin does not necessarily apply to all the above-mentioned vehicles, some vehicles may have been modified before delivery. The owners of the vehicles affected by this bulletin will be advised by a letter indicating the Vehicle Identification Number (VIN) of each vehicle concerned.</p>	

DESCRIPTION

On the vehicles affected by this bulletin and equipped with a preheater, there is a possibility that the clamp holding the preheater exhaust pipe be not properly positioned.

Make sure that holding clamp is located above splash guard panel and not beneath.

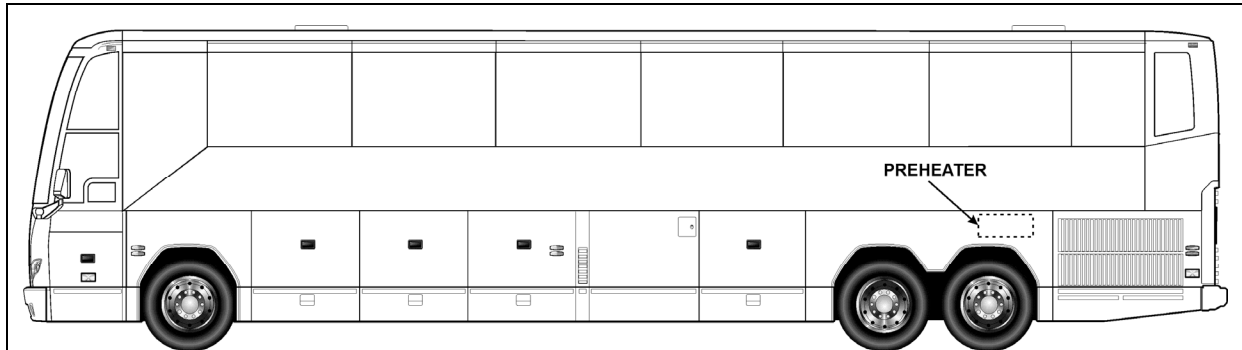

PROCEDURE

DANGER

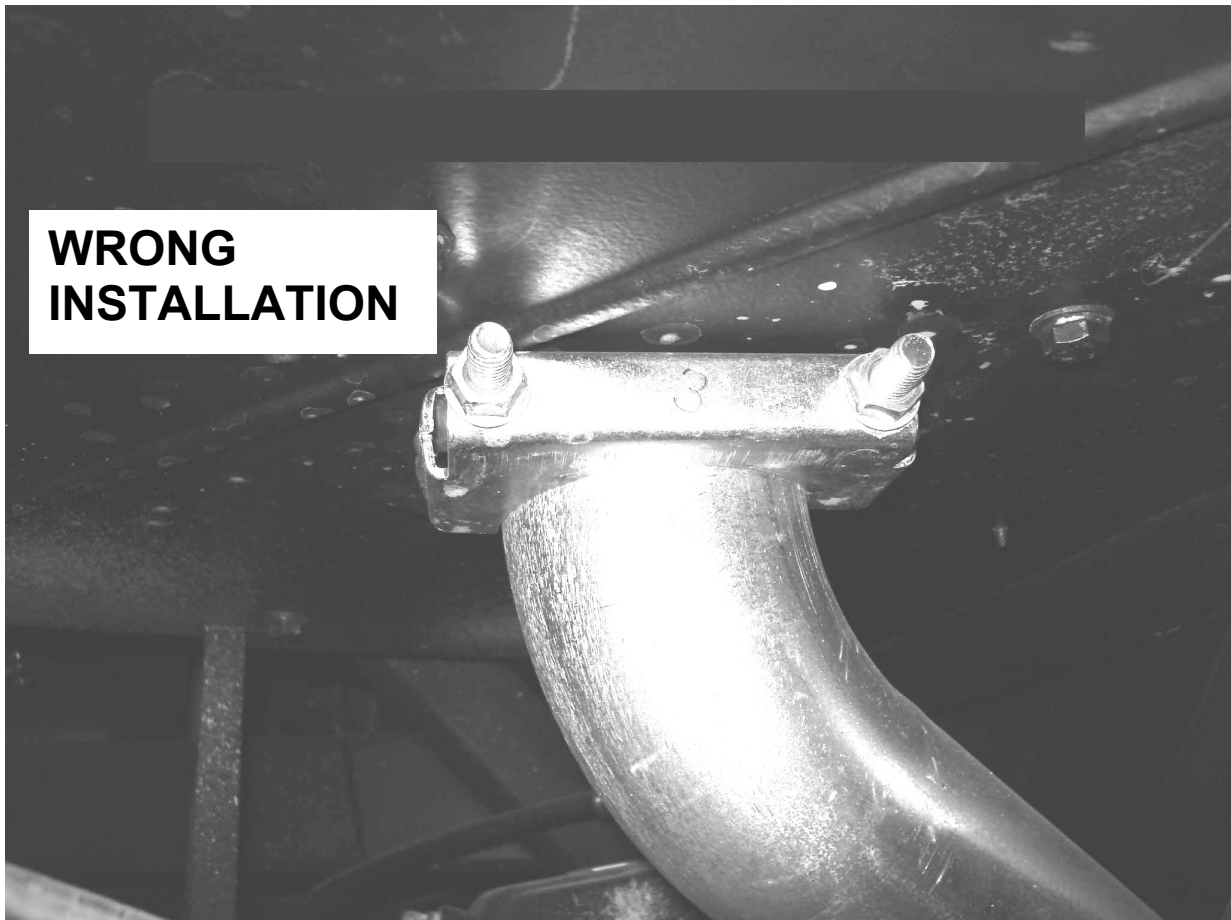

Park vehicle safely, apply parking brake, stop engine and set battery master switch(es) to the OFF position prior to working on the vehicle.

INSPECTION

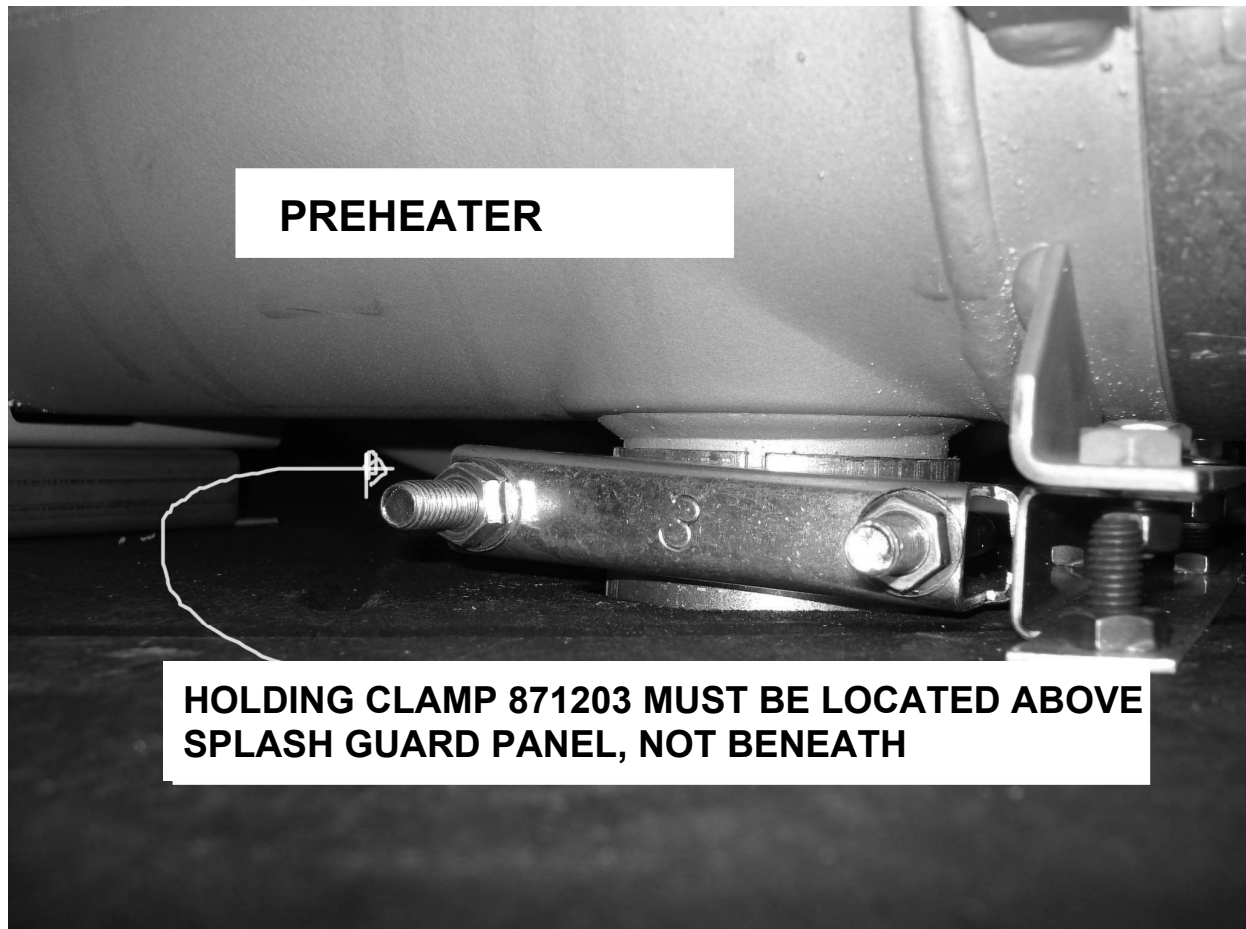

1. Check if the clamp holding the preheater exhaust pipe is located above or beneath the splash guard panel. This splash guard panel is located above the tag axle L.H. side wheel.
2. In the case where the clamp is located under the panel, it must be removed and repositioned.

**WRONG
INSTALLATION**

RELOCATION

1. Dismount rear L.H. side fender.
2. Remove the clamp located beneath the splash guard panel and relocate it above the panel.
3. Reinstall rear L.H. side fender.

WARRANTY

This modification is covered by Prevoth's normal warranty. We will reimburse you ½ hour (0.5) of labor upon receipt of a completed A.F.A. form on which you must specify as per "Warranty Bulletin 09-23".

Parts / Waste disposal:

Discard waste according to applicable environmental regulations (Municipal/State[Prov.]/ Federal)
