DESCRIPTION

In order to allow the humidity removal when the exterior temperature is cold, a new model of heat and air conditioning control module is available. This new control module enables the good working order of the air conditioning when the exterior temperature is as low as – 4 °C (25 °F). To proceed with this modification, order part **#871163R** in replacement to parts #871163 and #871175.

MATERIAL

Part No.	Description	Qty
871163R	Heat and air conditioning control module	1

Note: Material can be obtained through regular channels.

PROCEDURE

Warning: Park vehicle safely, apply parking brake, stop engine and set battery master switch(es) to the OFF position prior to working on the vehicle.

1. Remove the dashboard cover panel (figure 1, item 3).
2. Using an 11/32" box, remove the heat and air conditioning control module (figure 1) from the front part of the dashboard.
3. Unplug the connectors of the module.
4. Replace the control module with the new one (#871163R).
5. Connect the connectors to the new control module. Install the module in the dashboard.
6. Verify the good working order of the new module.
7. Replace the dashboard cover panel (figure 1, item 3).

WARRANTY

This modification is covered by Prévost Car's normal warranty. We will reimburse you the parts and 15 minutes of labor upon receipt of the former control module and a completed A.F.A. form on which you must specify as per "Warranty Bulletin 99-07".
